CAREER OBJECTIVE

Aspiring Software Engineer with strong skills in Python, Java, Web Development, Database Management, and hands-on experience in Machine Learning, Full Stack Development, and Data Analysis. Passionate about building scalable, data-driven applications and leveraging AI/ML, Generative AI, and Prompt Engineering to solve real-world problems.

EDUCATION

- Bachelor of Engineering (CSE)**
Beary's Institute of Technology, Mangalore 2022–2026
CGPA: 9.34
- PUC (PCMB) – 81.6%**
Aacharya Institute of Management & Science, Bengaluru 2021-2022
- SSLC – 91.36%**
Shushruthi Vidhya Samsthe, Bengaluru 2019-2020

INTERNSHIPS

- Machine Learning Intern - Inventeron Technologies** Jan 2026 – May 2026
- Developed machine learning models for real-world applications using Python and supervised learning techniques
 - Performed data preprocessing, feature engineering, and model evaluation
- Artificial Intelligence Intern - iStudio** Oct 2025 – Mar 2026
- Selected through iCAT for structured AI internship program
 - Built AI/ML models through project-based learning and real-time assignments
- Machine Learning Intern - Teachnook** Dec 2023 – Jan 2024
- Implemented regression and classification models using Python
 - Used NumPy, Pandas, Matplotlib, and Scikit-learn for data analysis

PROJECTS

- OmniDetect AI** 
 - Built a comprehensive AI-driven detection system capable of recognizing and analyzing various objects and scenarios through advanced computer vision algorithms.
 - Developed real-time detection and classification workflows by integrating deep learning models with image processing techniques.
 - Optimized model performance and system scalability to support intelligent monitoring, automation, and decision-making applications.
- Face Recognition Attendance System** 
 - Built an automated attendance system using face recognition to enable accurate and contactless tracking.
 - Implemented real-time facial detection and identification using computer vision techniques.
 - Designed a structured pipeline for image processing, data storage, and attendance management.
- Brain Tumor Detection System (BrainScan AI)** 
 - Developed a deep learning-based model to classify medical images and detect brain tumors with high accuracy.
 - Implemented end-to-end pipeline including image preprocessing, feature extraction, and model evaluation.
 - Applied computer vision techniques to analyze complex medical image data for diagnostic support.
- Driver Drowsiness Detection System** 
 - Designed a real-time monitoring system to detect driver fatigue using facial landmark analysis.
 - Implemented computer vision techniques to track eye movement and trigger alerts for safety.
 - Built a responsive alert mechanism to prevent accidents caused by driver drowsiness.

TECHNICAL SKILLS

- Programming Languages: Python
- Web Development: HTML5, CSS3, JavaScript, TypeScript, React.js, Next.js, UI/UX
- Database Management: MySQL, SQL, SQLite, DBMS
- Libraries: NumPy, Pandas, Matplotlib, OpenCV, TensorFlow, Keras
- Tools & Platforms: Git, GitHub, Git Bash, Jupyter Notebook, VS Code, Microsoft Office
- AI / ML & Data Science: ML, DL, TensorFlow, Image Processing, Computer Vision, OpenCV, Predictive, Regression Modeling
- Emerging Skills: Vibe Coding, Generative AI, Prompt Engineering, AI Tools & Development

LANGUAGES KNOWN

- English
- Kannada
- Telugu
